

⚠ BUSINESS PROBLEM

Modern travelers suffer from fragmented trip planning, manual budget calculations, and scattered destination insights across multiple unintegrated tools.

🛠 PROPOSED SOLUTION

A unified Flutter cross-platform mobile app leveraging generative AI models to build automated personalized itineraries, expense forecasts, and real-time guidance.

👥 TARGET AUDIENCE

- Solo Explorers
- Vacation Families
- Digital Nomads
- Budget Travelers

🔗 End-to-End System Architecture & Data Flow

Cross-Platform Architecture

🧠 Core AI Modules

- Smart Itinerary Builder:** Generates tailored multi-day travel schedules.
- Expense Estimator:** Predicts local travel costs based on preferences.
- Spot Finder:** Recommends hidden gems based on real-time location.

🔧 Technology Stack

- Flutter
- Dart
- Firebase
- Gemini / AI
- Maps API
- SQLite
- Git / GitHub
- REST APIs

📅 Roadmap Phases

- UX Wireframing & Requirements
- Flutter UI & State Architecture
- AI Model & Maps API Pipeline
- Integration, Testing & Deployment

✅ Project Deliverables

- ✓ Cross-Platform App
- ✓ AI Itinerary Engine
- ✓ Cloud Backend & DB
- ✓ Project Repository
